India & Sustainability Standards 2027

Centre for Responsible Business's
Annual Flagship Summit

FEBRUARY 10 - 12, 2027

BHARAT MANDAPAM, NEW DELHI

Responsible Business in the Era of *Inspiring Disruptions*

About India and Sustainability Standards (ISS)

India's Premier Platform for Sustainability Dialogue & Action

Thirteen years ago, ISS began as a dialogue on sustainability standards. Today it is something bigger - an annual summit where stakeholders with an interest in sustainability come together to examine solutions and opportunities - what makes it possible, and what still needs to change.

ABOUT ISS

Over three days, ISS brings together private sector and public enterprise, government and civil society, academia and youth, international organisations and the communities whose futures are most directly at stake. The mix is deliberate. Sustainability cannot be advanced in isolation, and ISS is founded on the belief that sustainability is everyone's business — cutting across sectors, scales and perspectives.

WHY ISS

What keeps people coming back to ISS is what the summit makes possible. Conversations that open new possibilities. Commitments that hold because the right people made them together. An understanding of sustainability solutions and opportunities that is richer for having been explored across diverse and divergent perspectives.

ISS does not promise transformation in three days. It offers something more durable - a space, cultivated over thirteen years, where individual commitments become collective ones and sustainability becomes a shared endeavour.

SUMMIT FEATURES

- High - Level Expert Plenaries
- Multi-Stakeholder Dialogues & Ideation
- Global & Local Interface
- Innovation & Solutions Pavilion

WHO ATTENDS

Industry & Finance
Private sector organisations, public sector undertakings, investors and financial institutions engaging with sustainability as both a strategic priority and an operational reality.

Government & Policy
National and subnational government representatives, regulators and multilateral and bilateral development partners who shape the environment within which sustainability is pursued.

Research Institutions, Academia & Civil Society
Research institutions, academic bodies, civil society organisations and youth networks who bring independent analysis and the perspectives of those most directly affected by sustainability outcomes.

International Community
International organisations and agencies for whom India's sustainability experience is increasingly central to the global agenda they are working to advance.

ISS 2027 Theme & Tracks

The theme for ISS 2027, ***"Pursuing Sustainable Business in the Era of Inspiring Disruptions,"*** recognises the transformative shifts reshaping the global business landscape. From technological advancements and evolving trade dynamics to climate imperatives, changing regulations and shifting global value chains, businesses are navigating an era of unprecedented disruption. While these transitions present new challenges, they also create opportunities to rethink conventional business models, accelerate innovation and strengthen competitiveness through sustainability. ISS 2027 will bring together stakeholders to explore how these disruptions can be harnessed to build more resilient, inclusive and sustainable enterprises, value chains and economies.
